

## Questionnaire for OWASP ASVS project

Group nr: 5

Group members (unless this is already correct on <http://www.cs.ru.nl/~erikpoll/ss/project2/groups.html>) :

Group De Kock / Kokx / Meeuwenberg

This questionnaire tries to get a rough indication of the level of skills and experiences when it comes to web applications, PHP, and web application security. The only reason for asking this is to see if we can get some interesting empirical data at the end, on if and how your level of experience impacts your findings.

It's not relevant in any way for your grade - so simply fill it in honestly. No need to over- or undersell your experience in the hope of making a better impression :-)

For each question, tick one box per team member.
