

## Contents

<b>Foreword</b> .....	iv
<b>Workshop Programme</b> .....	v
<b>List of Participants</b> .....	viii
<b>T. Altenkirch</b> Proving Strong Normalization of CC by Modifying Realisability Semantics .....	1
<b>P. Audebaud</b> CC <sup>+</sup> : An extension of the Calculus of Constructions with fixpoints ...	15
<b>F. Barbanera and S. Berardi</b> A Symmetric Lambda Calculus for “Classical” Program Extraction .....	31
<b>B. Boyer and G. Dowek</b> Towards Checking Proof-Checkers .....	51
<b>T. Coquand</b> Infinite Objects in Type Theory .....	71
<b>T. Coquand and P. Dybjer</b> Intuitionistic Model Constructions and Normalization Proofs .....	85
<b>T. Coquand and J. Smith</b> What is the status of pattern matching in type theory?	111
<b>G. Dowek, G. Huet and B. Werner</b> On the Definition of the $\eta$ -long Normal Form in Type Systems of the Cube .....	115
<b>H. Geuvers</b> Conservativity between logics and typed $\lambda$ calculi .....	131
<b>S. Hayashi</b> Logic of refinement types .....	157
<b>L. Helmink, M. Sellink and F. Vaandrager</b> Proof-Checking a Data Link Protocol	173
<b>M. Hofmann</b> Elimination of extensionality in Martin-Löf type theory .....	213
<b>L. Magnusson</b> Refinement and local undo in the interactive proof editor ALF .....	227
<b>S. Maharaj</b> Encoding Z Schemas in Type Theory .....	245
<b>M. Miculan</b> The Expressive Power of Structural Operational Semantics with explicit assumptions .....	253
<b>B. Nordström</b> The ALF proof editor .....	285
<b>C. Parent</b> Developing certified programs in the system Coq, The Program tactic ...	299
<b>F. Pfennig</b> Refinement Types for Logical Frameworks .....	315
<b>R. Pollack</b> Closure Under Alpha-Conversion .....	329
<b>C. Raffalli</b> Machine Deduction .....	347
<b>A. Ranta</b> Type theory and the informal language of mathematics .....	363
<b>D. Wolfram</b> Semantics for Abstract Clauses .....	375
