

A1: Getting names in a list (4)

Now that you know how to get names showing up properly, it is time to create an attendance list that meets some requirements:

- The list should fit on two pages of A4.
- It is shown in three columns.
- Even 'Marthijn van den Nieuwenhuizen' should fit on a single line within a column.

In order to help you, all students are in the file as `\student{Gijs Kopmeiners}`, so what you should do is to modify the definition of the command `\student` in such a way that you get a nice box in front of the name.
