Contents

Preface **iii**

1 Introduction **1**
1.1 Intelligent systems and AI . . . 2
1.2 Some early examples . . . 3
1.3 Some recent examples . . . 6
1.4 Separating knowledge and inference . . . 7
1.5 Content of the book . . . 9
1.6 A problem domain . . . 11
Exercises . . . 12

2 Logic and Resolution **15**
2.1 Propositional logic . . . 16
2.2 First-order predicate logic . . . 21
2.3 Clausal form of logic . . . 26
2.4 Reasoning in logic: inference rules . . . 30
2.5 Resolution and propositional logic . . . 32
2.6 Resolution and first-order predicate logic . . . 34
2.6.1 Substitution and unification . . . 35
2.6.2 Resolution . . . 38
2.7 Resolution strategies . . . 41
2.7.1 Semantic resolution . . . 43
2.7.2 SLD resolution: a special form of linear resolution . . . 48
2.8 Applying logic for building intelligent systems . . . 54
2.8.1 Reasoning with equality and ordering predicates . . . 55
2.8.2 Reasoning models . . . 57
2.9 Logic as a representation formalism . . . 68
Exercises . . . 69

3 Production Rules and Inference **73**
3.1 Knowledge representation in a production system . . . 74
3.1.1 Variables and facts . . . 74
3.1.2 Conditions and conclusions . . . 76
3.1.3 Object-attribute-value tuples . . . 79
3.1.4 Production rules and first-order predicate logic . . . 81
3.2 Inference in a production system . . . 84

3.2.1 Top-down inference and production rules . . . 86
3.2.2 Bottom-up inference and production rules . . . 95
3.3 Production rules as a representation formalism . . . 104
Exercises . . . 105

4 Frames and Inheritance 107
4.1 Semantic Nets . . . 108
4.1.1 Vertices and labelled arcs . . . 108
4.1.2 Inheritance . . . 112
4.1.3 The extended semantic net . . . 115
4.2 Frames and single inheritance . . . 117
4.2.1 Tree-shaped frame taxonomies . . . 117
4.2.2 Exceptions . . . 127
4.2.3 Inheritance and attribute facets . . . 130
4.2.4 Subtyping in tree-shaped taxonomies . . . 133
4.3 Frames and multiple inheritance . . . 139
4.3.1 Multiple inheritance of attribute values . . . 139
4.3.2 Subtyping in graph-shaped taxonomies . . . 151
4.4 Frames as a representation formalism . . . 155
Exercises . . . 156

5 Reasoning with Uncertainty 159
5.1 Production rules, inference and uncertainty . . . 160
5.2 Probability theory . . . 165
5.2.1 The probability function . . . 165
5.2.2 Conditional probabilities and Bayes' Theorem . . . 167
5.2.3 Application in rule-based systems . . . 169
5.3 The subjective Bayesian method . . . 172
5.3.1 The likelihood ratios . . . 172
5.3.2 The combination functions . . . 174
5.4 The certainty factor model . . . 179
5.4.1 The measures of belief and disbelief . . . 180
5.4.2 The combination functions . . . 181
5.4.3 The certainty factor function . . . 183
5.5 The Dempster-Shafer theory . . . 187
5.5.1 The probability assignment . . . 187
5.5.2 Dempster's rule of combination . . . 191
5.5.3 Application in rule-based systems . . . 194
5.6 Bayesian networks . . . 196
5.6.1 Knowledge representation in a Bayesian network . . . 197
5.6.2 Evidence propagation in a Bayesian network . . . 200
5.6.3 The reasoning method of Kim and Pearl . . . 201
5.6.4 The reasoning method of Lauritzen and Spiegelhalter . . . 206
Exercises . . . 212

6 Model-based Reasoning **215**
6.1 Diagnostic problem solving 216
6.2 Conceptual basis of diagnosis 218
6.3 Formal theories of diagnosis 222
6.3.1 Consistency-based diagnosis 222
6.3.2 Abductive diagnosis 227
6.3.3 Set-covering theory of diagnosis 238
6.3.4 Hypothetico-deductive diagnosis 243
6.4 Frameworks of diagnosis 244
6.4.1 Expressiveness of theories of diagnosis 245
6.4.2 Generalisation towards frameworks of diagnosis 246
Exercises 253
