

# European Science Foundation

ESF focuses on science driven collaboration between the best European researchers in all disciplines.

We promote the identification and advancement of leading edge science in Europe in close co-operation with our Member Organisations.

We bring together leading scientists, scholars and funding agencies to explore new directions in research and to plan and implement European level research collaboration in a global context.

Our main instruments include conferences, scientific foresights, collaboration programmes and support to outstanding young researchers.

ESF also manages COST, an intergovernmental framework for European co-operation in the field of Scientific and Technical Research.
